

# BIOORALL

## K-CORAL SHAMPOO

A shampoo containing Coral Algae for the total reconstruction of hair damaged by overly aggressive chemical treatments. Rich in amino acids from keratin, pro vitamin B, vitamins A and E, it has a permanent reconstructive and anti-oxidant effect to prevent ageing of skin and the hair shaft.

HOW TO USE: apply the required amount of product on wet hair and shampoo, gently. Rinse and repeat if necessary. Proceed to apply Re-Constructive Oil or Coral Algae Mask.

## CORAL ALGAE MASK

A nourishing mask containing Coral Algae for total reconstruction of hair damaged by overly aggressive chemical treatments. Rich in substances similar to natural keratin, B, A and E group vitamins for hair's internal structure. Reconstruction with an anti-oxidant effect for preventing skin and hair ageing.

HOW TO USE: shampoo with K-Coral Shampoo. Towel dry to remove excess of water. Apply the required quantity of Coral Algae Mask and cover with a plastic shower cap and then a towel. Leave product in place for 5/10 minutes. Rinse with plenty warm water.

## RE-CONSTRUCTIVE OIL

Re-Constructive Oil is rich in vitamins, Coralline Algae and anti-oxidants to fight free radicals and ageing of the hair shaft. It also strengthens the hair's keratin structure adding strength, body and vitality.

HOW TO USE: shampoo the hair with K-Coral Shampoo and towel dry, apply the product to middle length and ends, lightly massage, leave it to process for 5/10 minutes. Rinse well with lukewarm water.

## SHINING MIST

Shining Mist, a NO-GAS spray containing active ingredients which add softness and special shine to the hair while eliminating static electricity.

HOW TO USE: use Shining Mist when hairstyling is completed, holding the applicator bottle at a distance of about 25/30 cm, spray sparingly to whole hair.

## SILK DROPS

Silk Drops, conditions, nourishes, gives shine and prevents split ends.

HOW TO USE: apply 2-3 drops of product using fingertips to lengths of hair and tips. Use on dry or wet hair.

# APPLICATION SCHEME

HANTESIS research and development laboratories have produced BIO-CORALL: a line of products for the permanent reconstruction of hair damaged by atmospheric agents, substances such as chlorine and overly aggressive chemical treatments, super-lightening colouring products or bleaching products.

BIO-CORALL contains Coral Algae, Keratin Amino Acids, Provitamin B, and Vitamins A and E. It works directly on the inside of the hair shaft, where it can be irreparably damaged, in the cortex. Coralline Algae is rich of highly moisturizing substances for the skin and hair; its tissues contain Amino Acids, Urea, Fructose and Vitamin PP to add strength, vitality, shine and softness to the hair, reconstructing it. Provitamin B nourishes the hair making it soft, smooth and shiny as silk. Vitamins A and E have an anti-oxidant effect to fight free radicals, fighting ageing to keep the skin and hair young and healthy. Hydrolysed keratin being a substance similar to Natural Keratin, nourishes the hair, adding softness, strength and shine all over.
