

DIRECTIONS: KHERAPY

Stage 1

Shampoo with Keratin Active Shampoo avoiding to rub the scalp as it is a hair product.

Leave in 5-10mins if treated hair. If virgin resistant hair leave in up to 20mins.

Rinse thoroughly and dry using a hairdryer and a paddle brush.

Stage 2

Apply Keratin Active Treatment as follows:

- Divide the hair into four parts,
- Starting from the nape, take sections of approx. 1 to 2.5cm. thick
- Wear appropriate gloves. Apply the product, (with the use of a brush for colors) starting from 3mm from the scalp right through to the ends.
- Comb the hair using a thick tail comb and make sure the product is distributed evenly on the whole length.

NB: do not apply an excessive amount of product as it could cause the hair to look oily and heavy. It could also cause problematic styling and/or flat ironing of the hair.

Cover the hair with a glad wrap and leave it to process for 20min. for resistant or natural hair leave it on for 30min.

Once processing time is over, remove the glad wrap, comb the hair to check that the application was even.

Using a hair dryer and flat, (paddle) brush dry the hair. Before using the flat iron make sure the hair is completely dry!!!

Stage 3

Straighten the hair using a flat iron.

Divide the hair into 4 sections

Starting from the nape. Taking sections of 3mm, flat iron each section from the roots ends.

- For damaged, bleached hair, or with double chemical treatments: set the flat iron on 204-210C and go over the same section with iron for 4-6 times.
- For tinted hair and hair with 50% or less of highlights, set the iron on 216-221C going over the same section with the iron 6-8 times.
- For natural or resistant hair set the flat iron on 227-232C going over the same section 8-10 times.
- If the hair presents split ends reduce the number of times going over with the flat iron on the ends.
- Complete the hairstyle.

NB: once the smoothing of the hair is completed DO NOT WASH THE HAIR FOR AT LEAST 72 HOURS.

Should the hair get wet, simply dry it and flat iron it with the flat iron set at a lower temperature.

AFTER AT LEAST 72 HOURS, for better results we recommend to wash the hair with Keratin Hydrotonic Shampoo and condition with Keratin Hydrotonic Mask.
